Ctrl-D	Enter Date. (Ctrl-Z to conclude entry.)
Alt-D	Enter Time. (Ctrl-Z to conclude entry.)

USB-Related Hot Keys:

Ctrl-U:	Toggle REC mode on/off. (REC displayed on right edge of display.) REC mode is aborted if no flash device present in connector. If no USB card detected, the modem's piezo is beeped after 5 seconds and REC mode is aborted.
Ctrl-N:	Enter name for USB file to be recorded. Ctrl-Z to conclude entry. Standard 8.3 file names accepted. (E.g., "FD2008-2.txt")
Ctrl-I:	Insert text into recording file. Ctrl-Z to conclude entry. The USB file must already be open (Ctrl-U) for this to work. The recording file remains open for additional Rx or Tx text, until Ctrl-U pressed again to close the recording file.

Recent Change Summary

- 1) Upload & Download Config**
Ability to write (upload) the modem's settings and macro text strings to the USB flash memory stick for editing on PC, and then transfer (download) the edited config.txt file back to the modem.
- 2) USB Add-On card support**
The USB add-on card makes your NUE-PSK Digital Modem more useful with its ability to record QSO text (receive and transmit) to a USB flash memory stick for archival and remote printing. Use of the USB card requires v1.33 (or later) software containing new keyboard commands for controlling the card functions, plus an improved and consistent set of text editing commands. The USB card fits into the existing modem enclosure with minimal mods, and a replacement bottom chassis is available with pre-drilled holes for the connectors.
- 3) USB-specific keyboard hot keys added:** Ctrl-U, Ctrl-N, Ctrl-I
- 4) Text entry made more intuitive and consistent ...**
- keystrokes made visible for all commands
- specific keyboard hot keys entered before text
- all text entry concluded with Ctrl-Z
- text entry beyond buffer limits sounds the beeper
- 5) Beacon Mode has been added to allow repetitive automatic transmissions to be made for experimental far-field measurement tests.** Able to insert a counter in Beacon macro 7.
- 6) RTTY mode supported (transmit and receive).**
- Ctrl-R reverses the frequency order of Mark and Space
- Operate transceiver in USB mode. Press Ctrl-R if received signal not being immediately decoded at the cursors.
- 7) RTCC Supported (on optional USB card).**
- 8) CW Mode Supported ...** See CW-related commands shown in bold on the Hot Key Map on page 2.

Example Usage of Keyboard Hot Keys
